

The Plastics Experts.

AGRU

Corporate mission

VISION

AGRU is established as the world's most important single-source supplier for high-quality products made from engineering plastics. Conservation of resources and respect for the environment occupy the foreground in all our business endeavours. Customers all over the world trust the plastics expertise the company has amassed in the course of a lifetime.

SUCCESSFUL SINCE 1948

The AGRU success story has been unfolding now for around seven decades. Founded back in 1948 by Alois Gruber senior, nowadays the company is one of the world's most important single-source suppliers for piping systems, semi-finished products, concrete protection liners and lining systems made from engineering plastics.

Our ability to supply everything from a single source sets us apart. We use only top-grade thermoplastic polymers as our raw materials. When it comes to application-technical consulting, we are your best partner in the field.

MISSION

AGRU supplies the plastics technology that makes customers from all over the world successful in their widely differing industries. As a reliable, experienced supplier we offer everything from semi-finished products through to technologically optimised injection mouldings, all from a single source. We handle the challenges from thousands of projects and evolve our products and services on a rolling basis. Uncompromising quality, outstanding customer benefit and high operational dependability are our maxims. We implement custom solutions and application-oriented new developments with the highest flexibility - with precision and economically. Our dedicated employees with plastics expertise make AGRU successful as a global player.

THE PLASTICS EXPERTS.

With its competence in producing engineering plastics components and developing tailored solutions, AGRU is present in virtually every sector of industry. The possibilities opened up by our products are manifold, just as the requirements of our customers are diverse.

The thermoplastics worked by AGRU are extremely high-quality engineering polymers used in virtually all branches of industry where durability, operational dependability, cost certainty and versatility are essential.

AGRU

customer orientation

“HIGH PRODUCT QUALITY MAKES A PIPING SYSTEM LEAKTIGHT – AN ISSUE ON WHICH AGRU IS RIGOROUSLY UNCOM-PROMISING.”

ALOIS GRUBER

AGRU is an acronym derived from the name of Alois Gruber: majority owner and CEO. Clear decisions, integrity and continuity characterise his company. AGRU customers appreciate the extraordinary flexibility and short reaction times made possible by this flat hierarchy. Just as they appreciate the reliability of the products and the dependability of every agreement we make. As a real family-owned company, AGRU is very much aware of its responsibility to customers, employees and the environment.

SATISFYING REQUIREMENTS WITH PRECISION

AGRU has built a reputation for satisfying its customers' wishes efficiently, cost-effectively and with superlative flexibility. Customer-oriented technical solutions, the ability to think outside the box and decades of hands-on experience are what it takes.

Pathbreaking in plastics technology

QUALITY

Operational reliability, on-time delivery and maximum customer benefit are our maxims. Over more than 50 years, the plastics experts have accumulated a wealth of expertise unique in the industry. This lifetime of experience flows into application-oriented innovation, high-tech production and outstanding service and logistics performance.

RELIABILITY

Different materials, technologies and products plus a worldwide network of partners all contribute to making AGRU a single-source supplier. For large-scale projects and special solutions in particular, AGRU is able to offer its customers a one-stop shop.

TECHNOLOGY LEADERSHIP

Producing at the cutting edge of technology, improving processes and optimising results are part and parcel of AGRU's guarantee of competitiveness. Day in, day out, we demonstrate our cost and quality leadership in our plants all over the globe. The technological edge means that AGRU solutions are consistently among the best in their field.

MANUFACTURING EXPERTISE

Quality and cost leadership are another two of our maxims. So our customers profit from state-of-the-art technologies at an unbeatable price-performance ratio. One major plus is our technological diversity: injection moulding is one of our core competences and another is the extrusion of thermoplastics. And working with fibre composites and fluoroplastics is an established tradition at AGRU.

PRODUCTIVITY

Productivity means taking know-how, automation technology, meticulous craftsmanship, process reliability, lean production and energy efficiency and combining them to optimum effect.

Top-grade fittings

MAXIMUM CUSTOMER BENEFIT

AGRU fittings for medium-retaining pipes are hallmarked by uncompromising precision, robustness and durability. In this respect, functionality and cost-effectiveness are two sides of the same coin. As an industry leader, our company produces injection-moulded fittings of enormous design complexity, using the very latest technologies.

PIPING SYSTEMS FROM AGRU DELIVER ON EVERYTHING THE MANUFACTURER PROMISES.

OPERATIONAL SAFETY

In exhaustive cycles that include abrasion tests, rigorous leak tests and bursting-pressure tests, our products are tested under conditions vastly harsher than those encountered in real-world operation. These huge safety margins allow AGRU users to rely one hundred percent on the quality, operational dependability, reliability and durability of our products.

Resource-saving production

SUSTAINABILITY

Conserving resources in production is second nature to AGRU. At AGRU, environmental protection starts in the product development phase. Flow simulations and materials analyses are the basis for the design of fittings that save energy in operation and achieve the same rigidity with less polymer in the mould. Procurement processes that set store by high quality, resource-conserving manufacturing processes and extremely long lifespans contribute to sustainability in all AGRU products.

RESOURCE RECYCLING

Process waste arisings are recycled in production, adding to sustainability.

Residual amounts of polymers arising during the production process are sorted into their different fractions. So they can be returned to the materials cycle and put to good use.

APPLICATION-TECHNICAL CONSULTATION

Very often, the material used turns out to be definitive in terms of the ultimate profitability of an engineering solution. Only if the raw material is perfectly matched to the real-world conditions of use can physical toughness and resistance to chemicals and temperature effects be fully to specification. Application-specific material selection is one of AGRU's core competences. As a professional partner for everything associated with plastics, AGRU can point out the most economical solution for any problem, no matter how big the challenge.

PRECISION WELDING – FOR DURABLE JOINS

With a global reputation as an innovative plastics expert and reliable business partner, AGRU offers comprehensive know-how plus many years' experience in material selection and installation of its products. In particular in welding technology AGRU was and still is a pioneer who sets new benchmarks with ground-breaking innovations.

Research & development

175 APPLICATIONS

97 GRANTED PATENTS

35 PATENT FAMILIES

WE CLAIM TO BE THE FIRST

Europe's first to produce fittings in injection moulds; the world's first to calender liners many meters wide. Once again the company has set new standards by building a clean-room plant for ultra-pure media piping systems.

1966: INJECTION MOULDING

1986: 7 M WIDE LINERS

2016: CLEANROOM PLANT

Innovation from the applications specialist

INNOVATION IS THE KEY TO SUCCESS

AGRU's plastics engineers are focused on the future. Only those who today are dealing with the customer- and target-group-specific requirements of tomorrow will be successful in the future.

GROUND-BREAKING INNOVATIONS HAVE BEEN A HALLMARK OF AGRU SINCE ITS EARLIEST DAYS.

SERVICES

AGRU's strengths extend far beyond the processing of plastics as such. Depending on customer requirements, the company offers services including:

Applications-engineering consulting in all build phases, selection of materials, training in welding processes, field supervisors, rental and sale of welding machines, day-definite delivery and much more.

CLEANROOM CLASS 5

PURAD PIPING SYSTEM

One stop shopping

AGRULINE

PIPING SYSTEMS

PE 100 piping systems for gas and potable water distribution as well as sewage water disposal and PE 100-RC piping systems for trenchless and sandbed-free installation available in dimensions up to OD 3260 mm.

INDUSTRIAL

PIPING SYSTEMS

Piping systems and double containment piping systems made of PP, HDPE-el, PPs, PPs-el, PVDF and ECTFE for industrial applications such as transport of aggressive media and contaminated sewage water.

AGRUAIR & AGRUSAN

PIPING SYSTEMS

AGRUAIR piping system made of PE 100 blue for various compressed air applications. AGRUSAN piping system made of PP-R red for cold and warm water within sanitary systems.

SEMI-FINISHED PRODUCTS

SEMI-FINISHED PRODUCTS

Sheets, bars and welding rods made of PP, PE, PPs, PPs-el, HDPE, HDPE-el, PVDF, ECTFE, FEP and PFA for the manufacturing of tanks and for use in apparatus engineering.

PURAD

PIPING SYSTEMS

PVDF-UHP, PP-Pure, Polypure and ECTFE piping systems for the distribution of ultra-pure-water in semiconductor, pharmaceutical and food industry.

CONCRETE PROTECTION

PROTECTIVE LINERS

Concrete protective liners and assembly profiles made of PE, PP, PVDF and ECTFE for the protection of your concrete structures from wear and chemical corrosion.

LINING SYSTEMS

GEOMEMBRANES

Geomembranes made of HDPE, VLD-PE, LLDPE and FPP as well as drainage systems made of PE and PP for the use in landfills, tunnels, ponds, hydraulic engineering.

AGRULINE

THE USER-FRIENDLY
PE 100-RC PIPING SYSTEM

ONE STOP SHOPPING

Pipes and fittings from one factory for maximum accuracy of fit

MAINTENANCE FREE PIPEWORK

Welded joints and PE 100-RC ensure high operational reliability

HIGH ECONOMIC EFFICIENCY

Simple assembly, high quality and long service lives

CERTIFIED MATERIALS

Raw materials in accordance to PE 100+ Association guidelines

MULTIFUNCTIONAL SYSTEM

For the distribution of gas and potable water and the disposal of sewage

PIPES AND LARGE DIAMETER PIPES

FITTINGS

INDUSTRIAL

PIPING SYSTEMS FOR INDUSTRIAL APPLICATIONS

FAST & EASY INSTALLATION

Pipes, fittings and customized solutions perfectly harmonized

MAINTENANCE FREE PIPEWORK

Welded joints and materials for high operational reliability

DOUBLE OPERATIONAL SAFETY

The compact Poly-Flo double containment piping system is highly reliable

HIGH MEDIA RESISTANCE

Pipes and fittings made from PE 100-RC/PP/PVDF/ECTFE

EXPERTISE IN PLASTICS

Decades of experience in plastics processing, research & development

PP PIPING SYSTEM

POLY-FLO

CONCRETE PROTECTION

LONGER SERVICE LIFE FOR CONCRETE BUILDINGS

FIRMLY SEALED SURFACES

Corrosion protection and sealing made of chemically stable plastics

FOR EVERY REQUIREMENT

Wide range of materials available (PE, PP, PVDF, ECTFE)

HIGH ECONOMIC EFFICIENCY

Simple assembly, high quality and long service life

HIGH OPERATING RELIABILITY

Best weldability ensures maximum tightness

EXPERTISE IN PLASTICS

Decades of experience in plastics processing, research & development

ULTRA GRIP

SURE GRIP

HYDRO+ / HYDRO^{CLICK}

SEMI-FINISHED PRODUCTS

MADE FROM PE, PP, PVDF, ECTFE, FEP, PFA

HIGHEST MEDIA RESISTANCE

A stable polymer is for each chemical application available

LESS OPERATING COSTS

Due to excellent material properties and extended maintenance intervals

ONE STOP SHOPPING

Comprehensive semi-finished product portfolio and extensive stock-keeping

CONSISTENTLY HIGH QUALITY

Raw material specifications, cutting-edge production & quality assurance

FABRIC BACKINGS

Chemically resistant fabrics made of various materials

SHEETS

BARS

WELDING RODS

AGRUAIR & AGRUSAN

FOR COMPRESSED AIR & SANITARY INSTALLATION

HIGH ECONOMICAL EFFICIENCY

Easy installation & universal use due to wide range of fittings

MAINTENANCE FREE PIPEWORK

No corrosion and debris inside the pipe because of smooth surfaces

FULL PRESSURE RESISTANCE

AGRUAIR made from PE 100-RC is ideally suited for compressed air handling

HIGH TEMPERATURE RESISTANCE

AGRUSAN made from PP-R red is perfect for hot & cold water pipelines

EXPERTISE IN PLASTICS

Decades of experience in plastics processing, research & development

PIPES & FITTINGS

LINING SYSTEMS

GEOMEMBRANES

CORROSION PROTECTION

Tunnel liners protect the inner concrete shell from aggressive mountain water

FOR SOIL & GROUNDWATER

For mining, water and landfilling, liquid manure & retention basins

ONE STOP SHOPPING

Lining systems, water stop profiles, perforated pipes, discs available

PROVEN QUALITY PRODUCTS

AGRU Lining systems are in compliance with many international standards

HIGH SUPPLY CAPABILITY

Global distribution network, high capacities

PERFORATED PIPES AND ACCESSORIES

GEOMEMBRANES

TUNNEL LINERS

WELDING

STATE OF THE ART WELDING
TECHNOLOGY FROM AGRU

BEADLESS WELDING

Fully automated welding process
and documentation

CONTACTLESS WELDING

Infrared welding technology for
highest purity and repeatability

EASIEST HANDLING

Touch screen and mobile machines to
perform overhead welds on site

HIGH PURITY, STERILE PIPING

Meeting semiconductor-, life science
and chemical industry demands

SP 110-B: BEADLESS

SP 110-S V3: INFRARED

SP 63 MOBILE: ON SITE

CUSTOM PARTS

MACHINED FOR A PERFECT FIT

TAILOR-MADE SOLUTIONS

Tailored entirely to the specific requirements of your business
